Technical Skills

Languages: PHP, C/C++, Javascript, Java

Databases: RDBMS (MySQL, PostgreSQL, etc.)

Frameworks: Laravel, Vue JS

Other Skills: REST APIs, Git, Docker, Linux, OOP, Redis, Socket programming, JQuery, Ajax, PHPUnit

Work Experience

Dotlines Technologies Ltd.

Engineer, Technology

January 2022 – Present

Dhaka, Bangladesh

Key Responsibilities

- Design, develop and maintain OutSystems applications, ensuring high performance, and scalability.
- Collaborate with cross-functional teams to define, design, and ship new features.
- Troubleshoot, debug and optimize application performance.
- Contribute to team best practices and knowledge sharing.

Notable Works

- Designed and developed a web portal for [Audra](#) routers, using Laravel for backend development and VueJS for the frontend to deliver a seamless and efficient user experience.
- Optimized database performance by modifying queries and implementing indexing strategies, resulting in improved efficiency and reduced response times.
- Developed persistent client-server connections using socket programming, enabling seamless communication between routers and servers.
- Implemented optimization techniques for DNS query caching, reducing latency and improving overall network performance.
- Developed dynamic sales statistics reports for [WiFiHaat](#), featuring interactive visualizations such as pie charts, line charts, and grid/table representations, implemented using Chart.js.
- Contributed to the development of some modules in a CRM application for [Carnival Internet](#), leveraging Laravel for backend development and Vue.js for the frontend.

Awards & Achievements

- Participated in ICPC Regional Dhaka Site in 2018, 2019
- Achieved honorable mentions in 10 national programming contests
- 2nd runner-up, Intra-University Programming Contest in 2019 in Southeast University

Education

Southeast University

Bachelor in Computer Science and Engineering

CGPA: 3.55

2016 – 2021

Dhaka, Bangladesh
